

Moon and Vine

A rosetted queen beneath a crescent moon, framed in vines and bats. For etching, or for coloring by candlelight.

1. Print at full size, trim along the dashed line, tape to the pumpkin and trace the main lines with a pushpin.
2. This design is too fine to cut through. Etch it instead: scrape the black lines into the skin with a loop tool or linoleum cutter.
3. Light it from inside with a bright candle or LED. The etched lines glow and the rest stays solid.
